PROFESSIONAL SUMMARY

High-performing Information Technology Specialist and U.S. Army Veteran with 5+ years of experience delivering enterprise-level IT solutions and secure user support across classified and unclassified networks. Proven success managing 4,000+ user accounts, leading Tier II help desk operations, and maintaining 98% cybersecurity compliance in high-tempo, global environments. Recently completed a **B.S. in Information Technology (Programming)** and the **CMMC Certified Professional (CPP)** credential. Expert in troubleshooting complex systems and developing backend solutions with **MySQL** and **PowerShell** to enhance operational efficiency. **Active TS/SCI Clearance.**

SKILLS & TECHNICAL COMPETENCIES

- **Development & Databases:** MySQL, ReactJS, JavaScript, HTML/CSS, PowerShell.
- **Systems Administration:** Active Directory, Entra ID, User Access Control (UAC), IT Asset Management.
- **Networking & Security:** LAN/WAN, NIPR/SIPR/MPE Environments, Cybersecurity Compliance.
- **Operations & Support:** Help Desk Management (Tier II), Cloud Systems Deployment, Technical Troubleshooting.
- **Tools:** Remedy Ticketing System, Army Unified Directory Service.

EXPERIENCE

United States Army (Various Locations)

Information Systems Team Lead

November 2022 – Present

- Resolved over 1,000 service requests with 100% resolution, effectively supporting global operations and minimizing critical user downtime.
- Configured 400+ cloud-based systems using Entra ID, significantly streamlining secure remote access and onboarding for international teams.
- Maintained a 98% cybersecurity compliance rate for 4,000+ users by diligently monitoring adherence to strict Department of Defense policies.
- Trained 16 team members on secure access protocols, successfully enabling uninterrupted and secure connectivity for over 3,000 users.
- Mentored junior IT staff and promoted continuing education, resulting in a 19% improvement in team-wide technical performance over six months.

Senior Information Technology Specialist

January 2022 – November 2022

- Designed and deployed a new ticketing system that reduced input errors by 50% and significantly increased response efficiency across the department.
- Resolved over 650 technical support requests with a 100% resolution rate, ensuring reliable access to communications and mission-critical applications.
- Imaged and configured 900+ computers for overseas deployment, facilitating a seamless transition to secure mission systems.

- Developed automated PowerShell scripts to monitor user accounts, effectively reducing administrative delays for remote teams.
- Provisioned over 600 user accounts and configured 900 laptops for global operations, ensuring total connectivity and mission readiness.
- Maintained absolute accountability for \$1.2M in high-value IT equipment with zero loss or service disruptions during high-tempo operations.

EDUCATION & CERTIFICATIONS

Bachelor of Science, Information Technology (Programming)
American Military University – Graduated October 2025

CMMC Certified Professional	MySQL Backend Developer	CompTIA Secure Cloud Professional
CompTIA Security+	ReactJS Framework Developer	HTML-CSS Web Designer
CompTIA Cloud+	JavaScript Professional	Active TS/SCI Clearance
